## A Descriptive Cross-Sectional Analysis of the Primary Health Care Centers and Sub-centers in Slemani Governorate

#### Dr. Hemin Dler Mohammed

M.Sc. Family & Community Medicine
D.O.H/ Slemani

#### PHC is:

Essential health care based on practical, scientifically sound and socially acceptable methods and technology made universally accessible to individuals and families in the community through their full participation and at a cost that community and the country can afford ... (Alma-Ata, 1978)

# Principles of Primary Health Care

Adequacy	Appropriateness		Affordability
Accessibility	Acceptability		Availability
Assessability			untability
Completeness	Comprehensiveness		Continuity

#### **Appropriateness**

 Whether the service is needed at all in relation to essential human needs, priorities and policies.

#### Adequacy

 The service proportionate to requirement to meet the need and demand of a community

#### **Affordability**

 The cost should be within the means and resources of the individual and the country.

#### Accessibility

 Reachable (Geographic, economic, cultural accessibility)

#### Acceptability

 satisfactory communication, trust, confidentiality and privacy of information shared with the providers.

#### **Availability**

 care can be obtained whenever people need it.

#### **Assessability**

 Assessebility means that medical care can be readily evaluated.

#### Accountability

 implies the feasibility of regular review of financial records by certified public accountants.

#### Completeness

 prevention, early detection, diagnosis, treatment, follow up measures, and rehabilitation.

#### Comprehensiveness

care is provided for all types of health problems.

#### Continuity

 Continuity of care requires that the management of a patient's care over time be coordinated among providers.

## **Primary Health Care Reform**

- The only region missed is Garmyan

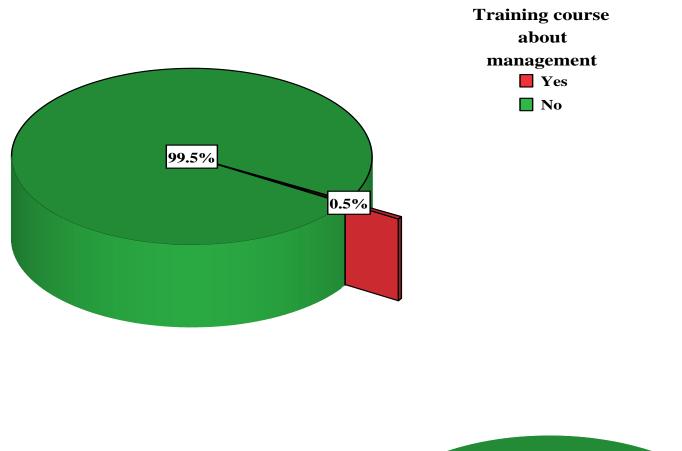

93.8%

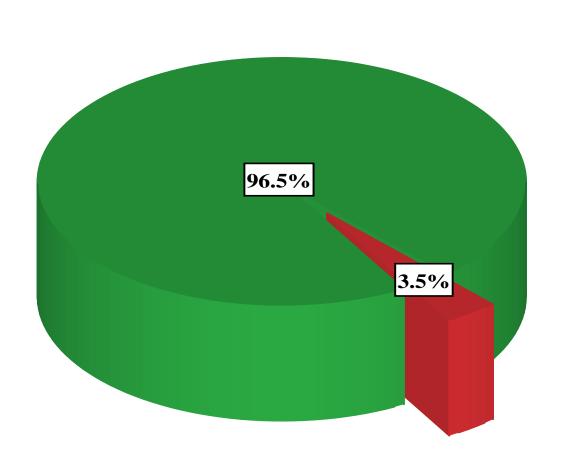

6.2%

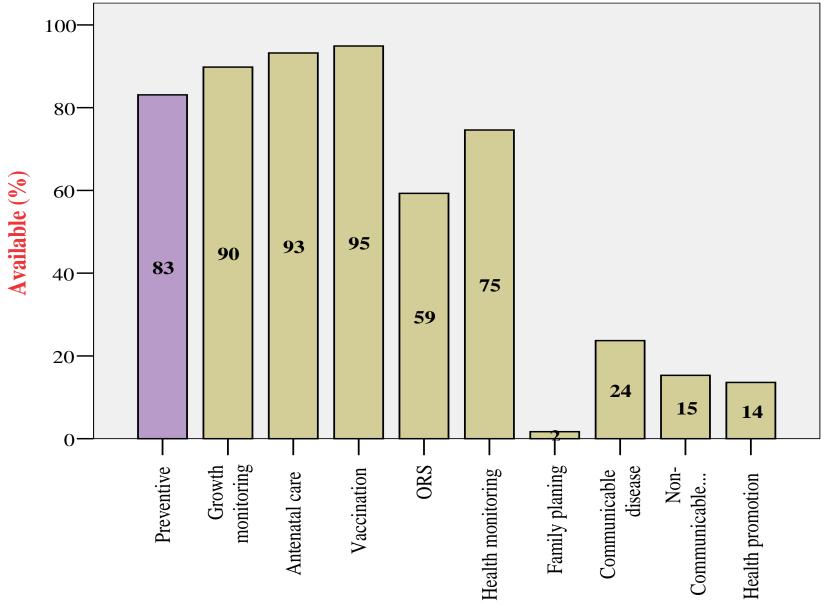

#### Having an active

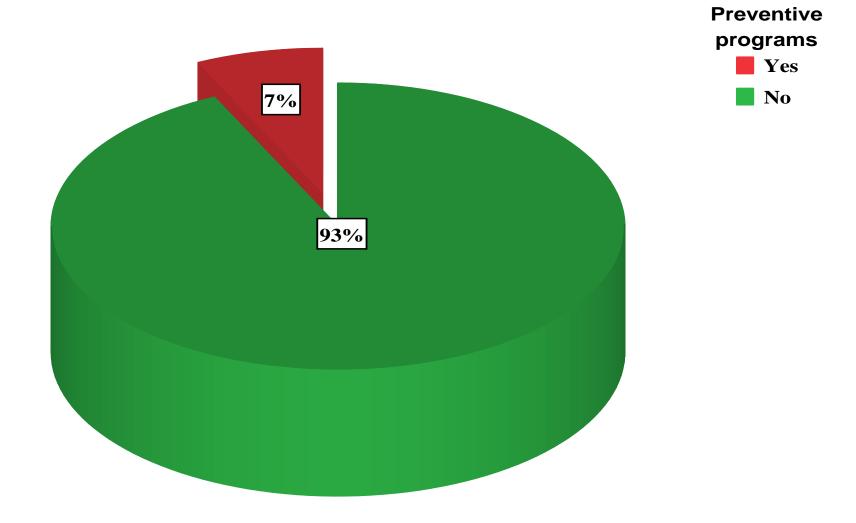

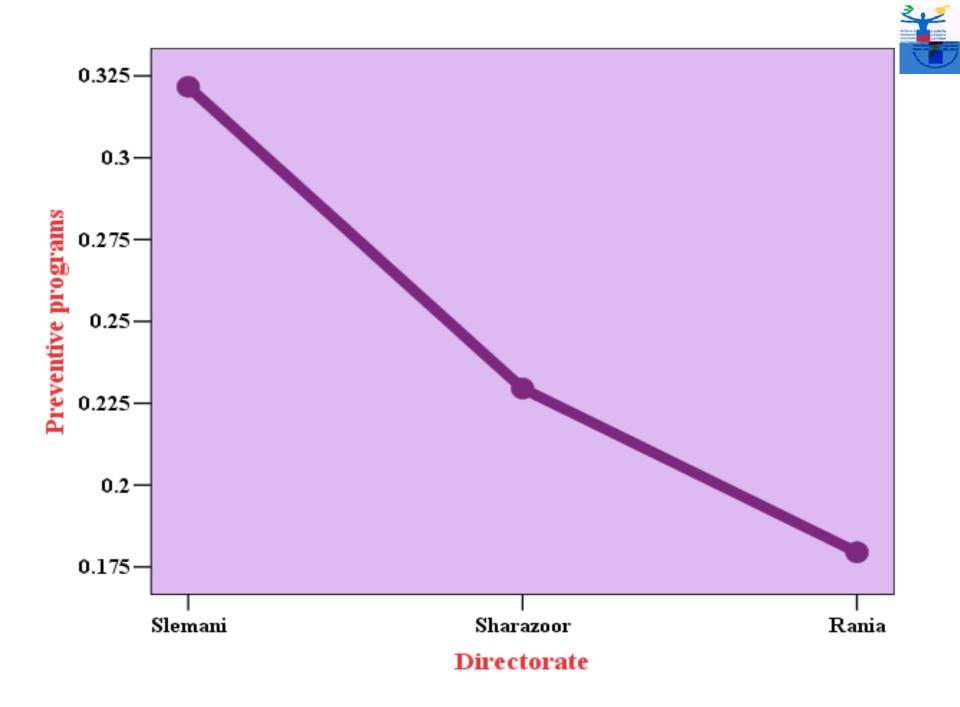

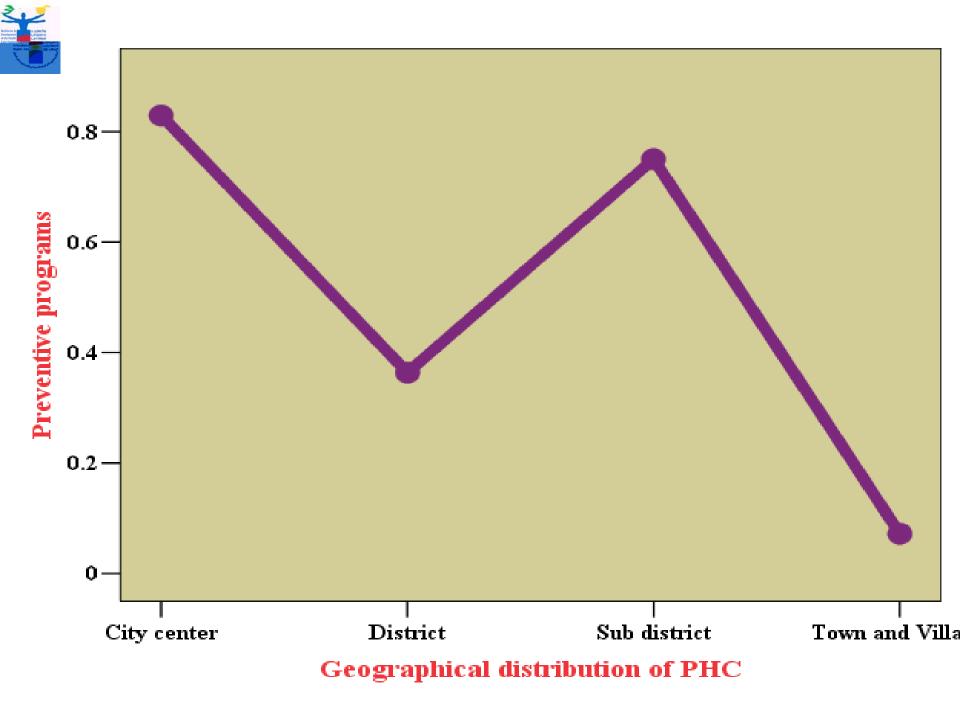

**Preventive programs status among PHC centers** 

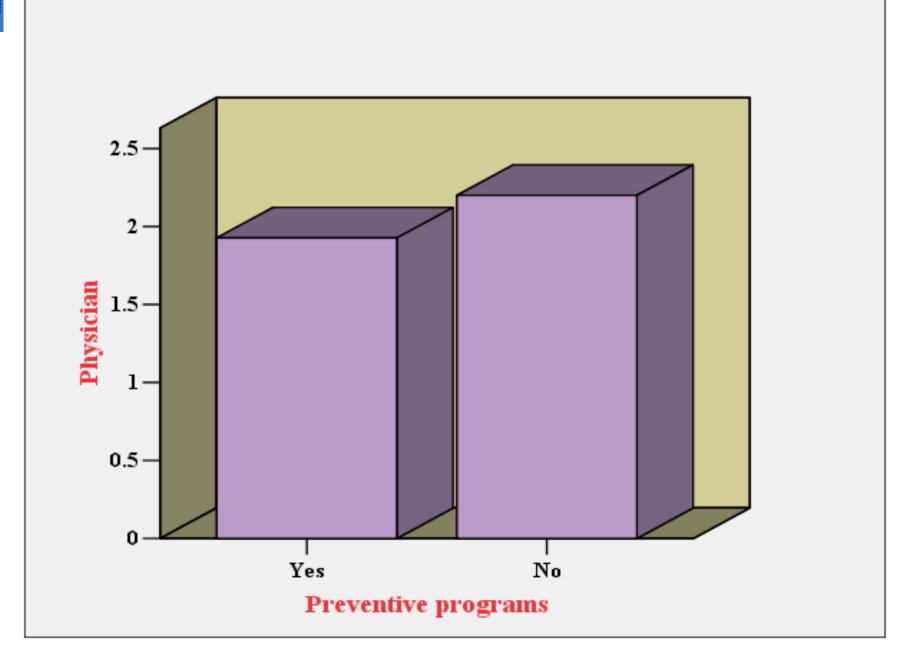

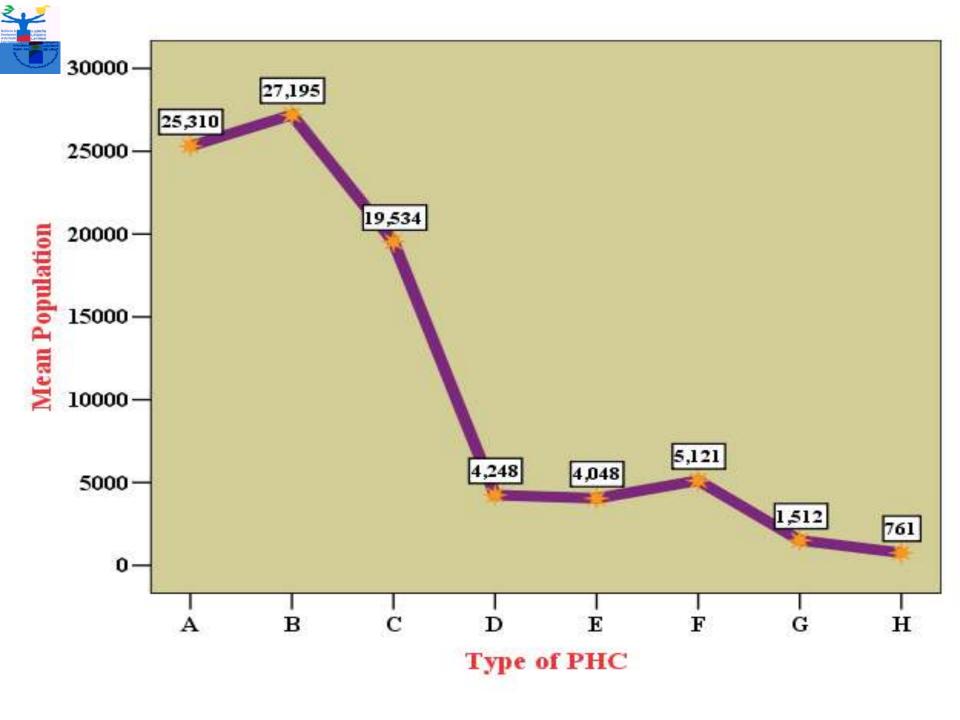

Availability of preventive programs among PHC sub-centers

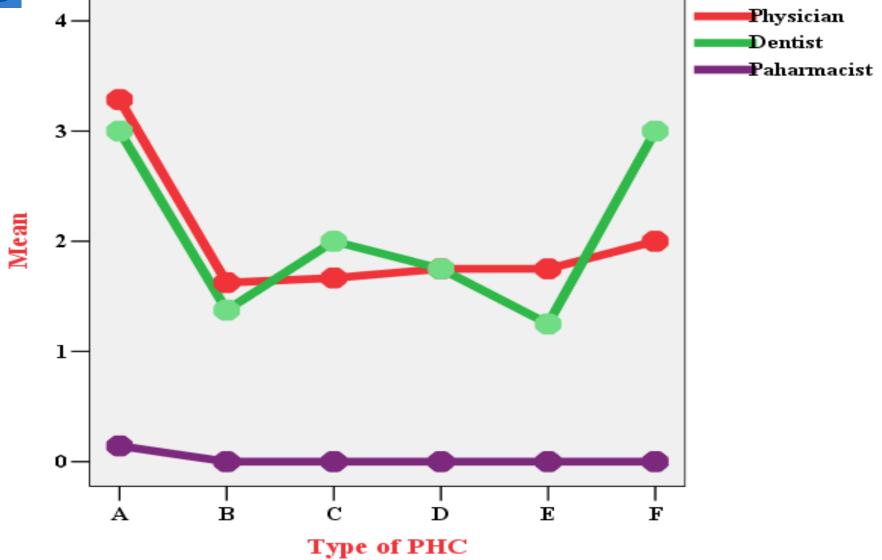

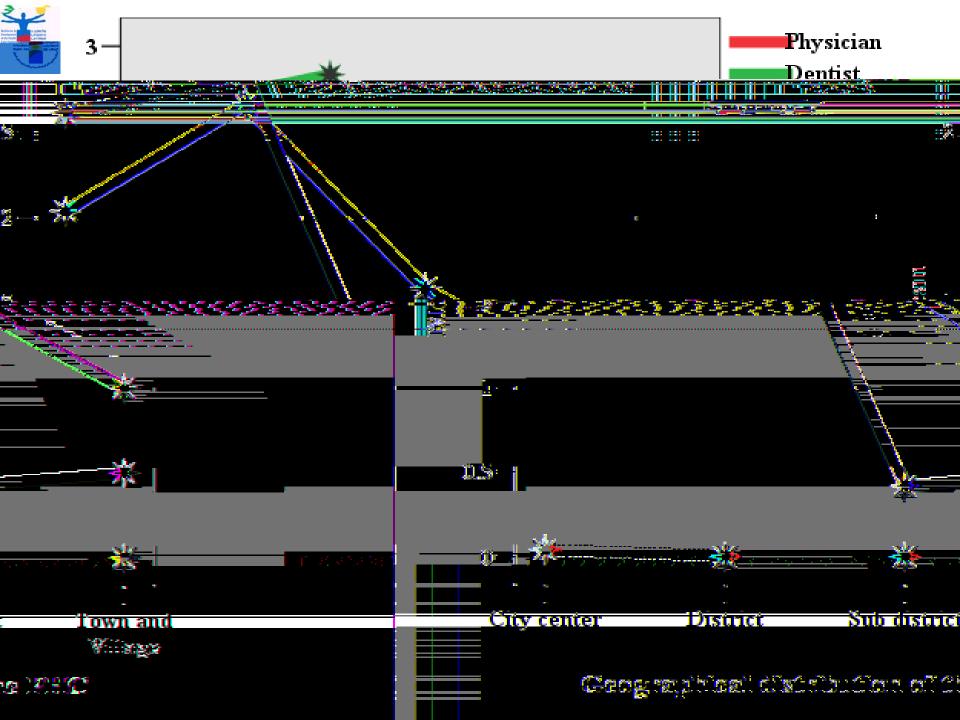

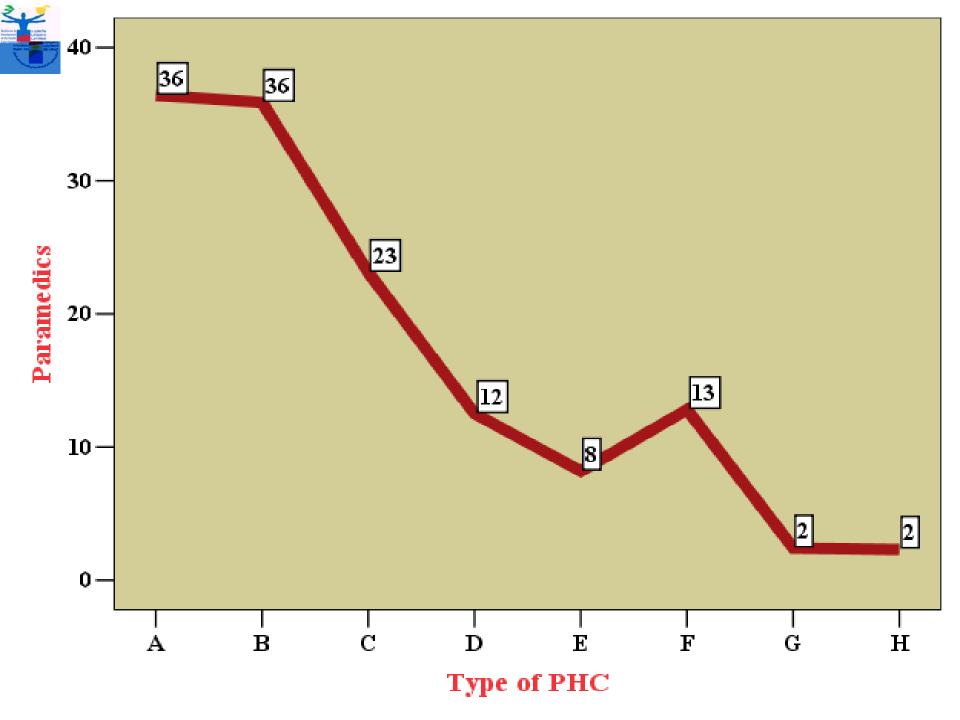

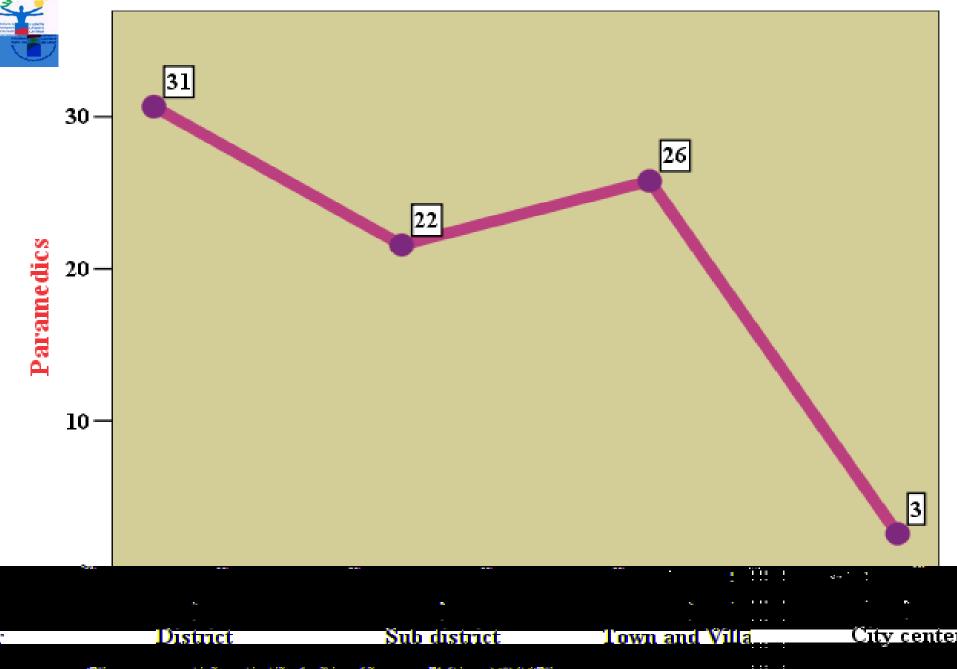

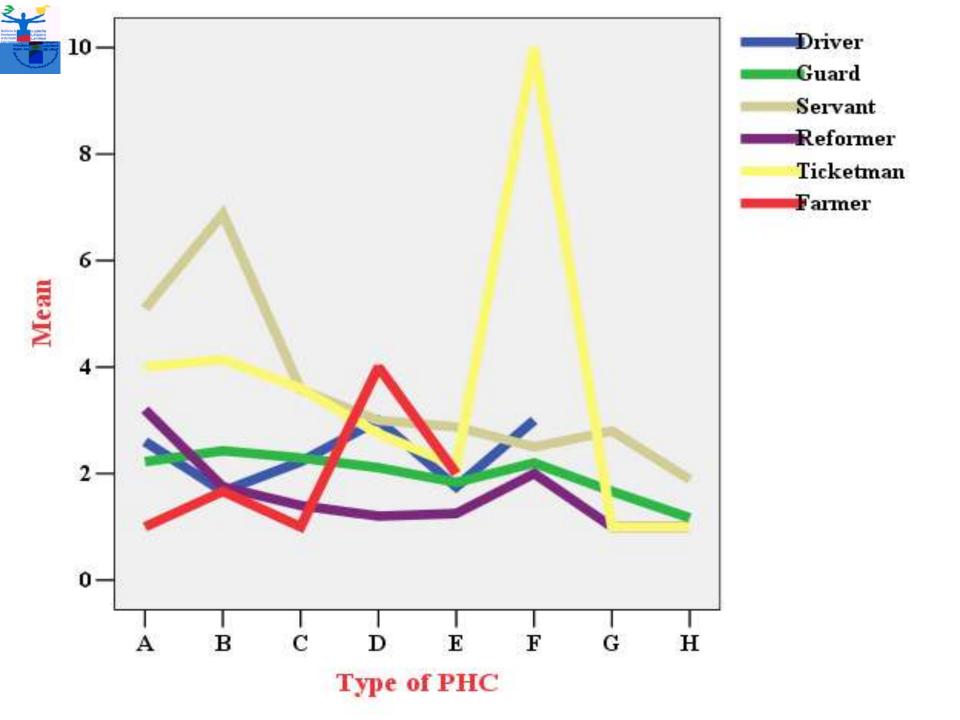

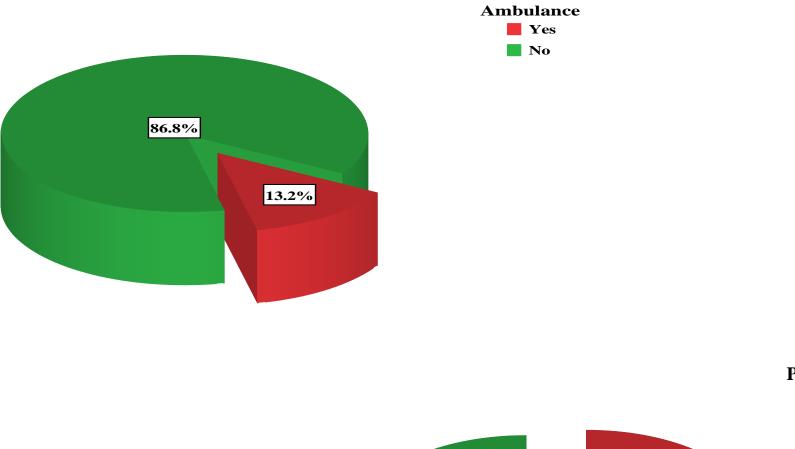

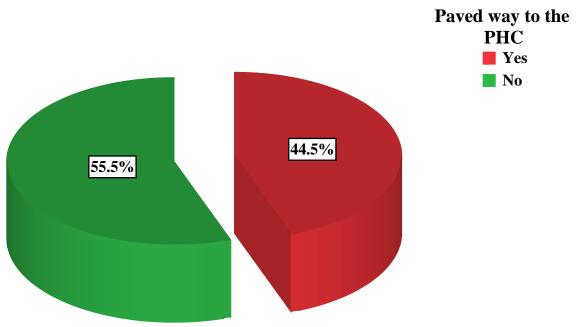

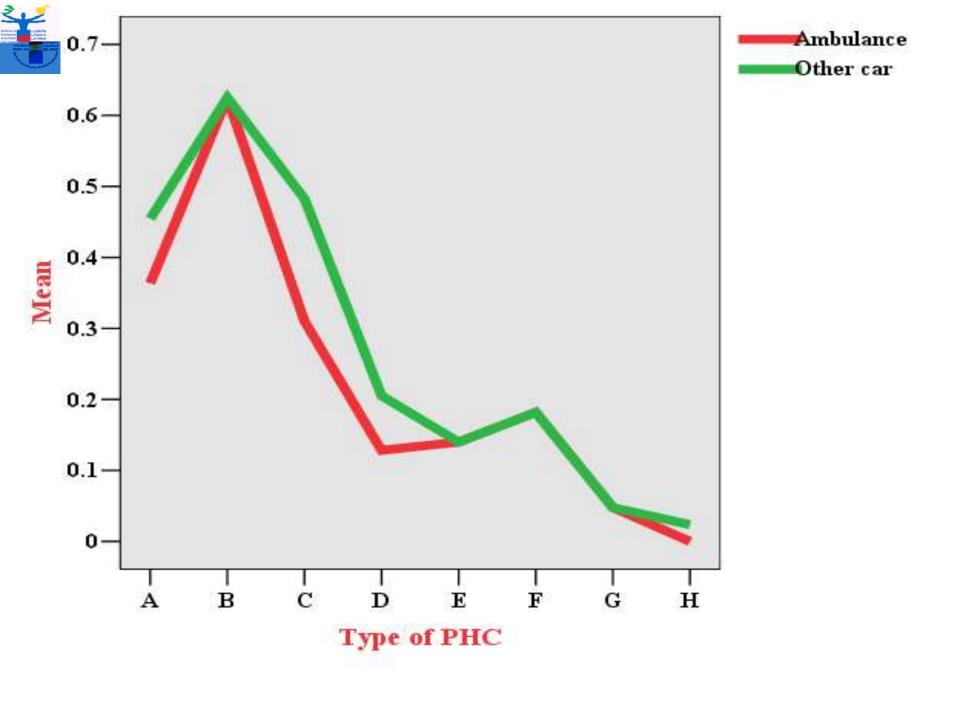

::: :

#### Recommendations

- Opening a new department for PHC in MoH;
- Redistribution of the available human and non-human resources based on the priorities and the need of the served population;
- Opening new centers and sub-centers only when really needed and according to the available scientific standards and with a quality that can assure principles of primary health care;

### Recommendations (cont.)

- Provision of all preventive health service programs hand in hand with the treatment programs in all PHC centers and sub-center;
- Changing some of the PHC centers to teaching centers in order to train the staff before employment (pre-employment training); and
- Establishment of family medicine system and a scientific referral system.
